## Wilson Tells of Noel Dishes

Also Explains Some of the Advantages of the Fireless Cooker on Hot Days

By MRS. M. A. WILSON

It is the season when the housewife should plan to utilize the fireless cooker to its full capacity. This eliminates much of the steam, and the time required to watch the fire while they are cooking. After the preliminary preparation, the food which is put to cook in the fireless cooker, so if the cooking time is to correspond with the time required for serving the meal the food will be found to be piping hot. The reason the mealtime is delayed is that the food will still be in the cooker when ready to serve. Delaying the food for two hours will not injure it, so that the fireless cooker really is a true friend of the busy housewife during the summer season. It is purchased at considerable savings when cooked in the fireless will be found to be tender and savory; this method is also convenient for cooking meats, cheaper and coarse cuts to make cold cuts, meat loaves and casseroles.
